

Before the FEDERAL COMMUNICATIONS COMMISSION Washington, D.C. 20554

In the Matter of Space Exploration Holdings, LLC **SAT-LOA-20260108-00016** Application for Launch and Operating Authority for the SpaceX Orbital Data Center

NOTICE OF CONTINUED AGENCY INACTION AND REQUEST FOR COMMISSION RULING

William Stewart (the Petitioner) hereby submits this formal Notice of Continued Agency Inaction and Request for Commission Ruling regarding multiple outstanding, unaddressed filings in the above-referenced proceeding. The Petitioner requests that the Commission immediately address these structural procedural deficiencies to preserve the integrity of the public record and ensure compliance with basic administrative due process.

I. Procedural Background and Documented Inaction

The Petitioner has consistently engaged with the Commission's public comment process to raise serious questions regarding regulatory compliance, conflict of interest, and data integrity. Despite the timely and precise submission of multiple formal administrative filings, the Commission has failed to issue any response, acknowledgement, or ruling.

The outstanding, unaddressed filings include the following items:

1. **PC0114325MOTION** (Filed March 29, 2026): "Motion for Disqualification of Chairman Carr & Record Correction." This filing raised critical concerns regarding potential administrative prejudgment and requested a necessary correction of the proceeding's factual record.
2. **PC0114423REQUEST** (Filed March 31, 2026): "Request for Commission Action – Formal Complaint of Malfeasance and Prejudgment." This request outlined specific concerns regarding administrative impartiality and requested immediate Commission oversight.
3. **PC0114476COMMENT** (Filed April 3, 2026): "REQUEST FOR COMMISSION ACTION – Request for Correction under Information Quality Act." This filing invoked the Information Quality Act to compel the correction of flawed data points relied upon within the docket.

As of the date of this filing, the Commission has allowed these entries to sit completely unaddressed on the public docket for over seventy days.

II. The Asymmetry of Regulatory Enforcement

The Commission's total administrative silence regarding these motions stands in stark contrast to the rapid progression of the underlying commercial interests involved in this docket. While small startups and independent participants are subjected to rigorous compliance and

transparency standards, the Commission has effectively cleared the runway for a massive corporate Initial Public Offering (IPO) while completely bypassing the formal challenges raised by a private citizen.

Allowing a proceeding to advance without addressing outstanding motions regarding conflict of interest and data quality undermines the purpose of the public comment framework. The Commission cannot lawfully treat public participation as a selective or optional component of its decision-making process.

III. Conclusion and Request for Relief

Administrative due process requires that formal motions be reviewed and resolved, rather than ignored through strategic inaction. The paper trail regarding these challenges remains a matter of permanent public record.

The Petitioner respectfully requests that the Commission fulfill its statutory obligations and immediately issue formal rulings on PC0114325MOTION, PC0114423REQUEST, and PC0114476COMMENT.

Respectfully submitted,

/s/ William Stewart
