

Before the FEDERAL COMMUNICATIONS COMMISSION Washington, D.C. 20554

In the Matter of Space Exploration Holdings, LLC Application for Orbital Data Center File No. SAT-LOA-20260108-00016

NOTICE OF SPACEX FINANCIAL DISCLOSURES (S-1) ADMITTING ODC MAY NOT BE VIABLE

News broke today (April 22) that SpaceX filed a Pre-IPO S1 statement admitting that the orbital data centers might NEVER BE COMMERCIALLY VIABLE due to 'technical complexity.'

The SpaceX S-1 filing explicitly uses the phrase "significant technical complexity" and warns that the project "may not achieve commercial viability."

This makes the Chairman's rush to approve this ludicrous plan even more suspect: he is fast-tracking a project that the company itself is now downplaying to investors.

Respectfully submitted,

/s/ William Stewart
