RE: Section 504 Accessibility Complaint and Procedural Inquiry
Proceeding: ICFS File No. SAT-LOA-20260108-00016
Public Notice: DA 26-113 (rel. February 4, 2026)

Dear Mr. Williams or Section 504 Compliance Officer:

I. PURPOSE

This is a formal accessibility complaint filed pursuant to the Rehabilitation Act of 1973¹ and the Commission's Section 504 Programs and Activities Accessibility Handbook.² It is addressed to you in your capacity as Section 504 Compliance Officer because the matter it documents falls within your direct supervisory and oversight responsibility under the Handbook.

On February 5, 2026, one day after the Space Bureau released DA 26-113 establishing a public comment period for the above-referenced proceeding, the undersigned contacted the Commission's designated accessibility office at FCC504@fcc.gov. The Public Notice itself directed accessibility requests to that address.³ The undersigned's email reported that the proceeding did not appear in ECFS, that three separate attempts to obtain filing instructions from ecfs@fcc.gov had returned DNS delivery failures over a period of more than 15 hours, and after approximately one day of attempting to participate through fcc.gov, and that no alternative filing pathway was apparent. It stated, in plain language: "**I need accessibility help**" to participate in the proceeding.⁴

¹ 29 U.S.C. Section 794 (Section 504); 29 U.S.C. Section 794d (Section 508).

² The Section 504 Handbook requires staff to assist requestors "to the best of [their] ability" and to forward requests to the Section 504 Officer "IMMEDIATELY" when they cannot satisfy the need.

³ DA 26-113 (rel. February 4, 2026). The standard accessibility language states: "People with Disabilities. To request materials in accessible formats for people with disabilities (braille, large print, electronic files, audio format), send an e-mail to fcc504@fcc.gov or call the Consumer & Governmental Affairs Bureau at 202-418-0530 (voice)."

⁴ The undersigned's email stated: "I need accessibility help in order to complete my public notice reply or a proper channel my submission can be submitted to." Full text reproduced at Appendix A.

The undersigned invoked the accessibility pathway because he needed accessibility help. The Public Notice directed accessibility requests to FCC504@fcc.gov without requiring that the requestor disclose the nature, category, or medical basis of an accessibility need as a precondition to receiving assistance. Section 504 prohibits conditioning access to federal programs on disclosure of disability status beyond what is necessary to provide the requested accommodation.⁵ The statement "**I need accessibility help**" was sufficient to trigger the Handbook's procedures. Independently, the Commission's infrastructure failures created access barriers that made the accessibility channel the correct channel regardless of the requestor's individual circumstances. A filing system that does not contain the proceeding and a public email that returns DNS failures are not accessible. The Section 508 framework specifically addresses access to federal electronic information technology, and the Handbook directs such issues to the Section 508 Coordinator.⁶ The Commission's infrastructure failures provided the occasion for the request. The FCC504 office's failure to follow the Handbook's mandatory procedures is the subject of this complaint.

The FCC504 office's response, received four days later, did not provide the requested assistance. It did not accept the undersigned's statement of need at face value. It did not route the request to the Section 504 Officer, as the Handbook requires when the office cannot satisfy a need. It did not forward the request to the Section 508 Coordinator, as the Handbook directs for issues involving access to electronic data and resources. It did not contact the bureau responsible for the proceeding. Instead, it redirected the undersigned to the same system the undersigned had just identified as nonfunctional for this proceeding, characterized its own role as limited to accommodations "such as sign language interpreters, Braille documents, etc. for FCC events,"⁷ and disclaimed responsibility for the request entirely.

The response provided no escalation pathway, leaving the requestor with no indication of where to go next within the agency. It took the undersigned over 40 days and significant independent research to identify this office, its obligations, and to file this complaint alongside eventual participation in this proceeding.

The undersigned brings this matter to your attention for the review and corrective action the Handbook contemplates. This letter does not address the merits of the underlying application. Its sole focus is the accessibility failure, the specific procedural departures from the Handbook, and the systemic implications for public participation in ICFS-housed proceedings. The documented timeline, legal framework, and outstanding questions are set forth in the appendices. The specific requests to which the undersigned seeks a written response are at Section II.

⁵ 29 U.S.C. Section 794; see also Appendix B.1 (discussing the no-disclosure principle under the Rehabilitation Act and the Handbook).

⁶ 29 U.S.C. Section 794d; see also Appendix B.2 (discussing the Section 508 framework and the Handbook's routing procedures for electronic access issues).

⁷ FCC504 office email response, February 9, 2026 (3:38 PM EST). Full text reproduced at Appendix A.

Seven days of the thirty-day comment period elapsed before the undersigned independently gained initial access to CORES and ICFS although additional barriers persisted.

As of the date of this letter, the ecfs@fcc.gov address continues to return identical DNS delivery failures. The Commission's published guidance continues to direct the public to this nonfunctional address as an active filing method.⁸ The full timeline, legal framework, procedural departures, and outstanding questions are set forth in Appendices A through E.

II. REQUESTS

The undersigned **respectfully requests a substantive written response to each of the following within 30 days of this letter.**⁹ This timeframe is grounded in three independent bases. First, 5 U.S.C. Section 555(b) requires agencies to act on requests "within a reasonable time," and this letter is such a request, and the Commission's own standard comment periods establish 30 days as the period the Commission considers reasonable for substantive engagement with a pending matter. Second, 5 U.S.C. Section 555(e) requires the Commission to provide a brief statement of grounds for denial of any written request made in connection with any agency proceeding, and the proceeding to which this complaint relates remains pending and may be acted upon at any time. Third, the Commission's own Section 504 Handbook establishes "IMMEDIATE" escalation as the standard when a need cannot be satisfied, and the undersigned's original request has been pending without compliant resolution since February 5, 2026, a period of 49 days. A response that does not address each numbered request individually will be treated as a non-response for purposes of any subsequent proceeding.¹⁰

1. That the Section 504 Compliance Officer state, in writing, whether the undersigned's February 5, 2026 email was logged in the Commission's accommodation tracking system when it was processed, and if not, what corrective action is warranted.
2. That the Section 504 Compliance Officer state, in writing, whether the February 9, 2026 response was consistent with the Handbook's requirement to assist requestors to the best of the office's ability and to escalate when the need cannot be satisfied.

⁸See Exhibit 1 (DNS delivery failure, February 5, 2026) and Exhibit 2 (DNS delivery failure, March 25, 2026). The failure message states: "Delivery has failed to these recipients or groups: ecfs@fcc.gov. Your message couldn't be delivered. The Domain Name System (DNS) reported that the recipient's domain does not exist." The Commission's published filing guidance at [fcc.gov/consumers/guides/how-comment](https://www.fcc.gov/consumers/guides/how-comment) continues to instruct the public to email this nonfunctional address.

⁹5 U.S.C. § 555(b) (requiring agencies to act on requests "within a reasonable time"); 5 U.S.C. § 555(e) (requiring agencies to state grounds for any denial). The thirty-day period mirrors the comment period the Commission established for the underlying proceeding and the period it allows regulated entities to resolve accessibility disputes before Enforcement Bureau escalation.

¹⁰5 U.S.C. Section 555(b) (requiring reasonable timeliness); 5 U.S.C. Section 555(e) (requiring stated grounds for denial); Section 504 Handbook (requiring 'IMMEDIATE' escalation). Failure to respond within the stated period will be documented and preserved as unreasonable delay under *TRAC v. FCC*, 750 F.2d 70 (D.C. Cir. 1984), and may support a petition for writ of mandamus under 5 U.S.C. Section 706(1).

3. That the Commission review whether current FCC504 office training and procedures are adequate to identify and route technical access inquiries regarding ICFS-housed proceedings to the appropriate bureau, division, or Section 508 Coordinator.
4. That this complaint and any responsive determination be placed in the record of ICFS File No. SAT-LOA-20260108-00016, as the documented accessibility failure bears directly on the adequacy of public participation in that proceeding.
5. That the Commission make the ECFS email filing form and instructions available as a direct electronic download on the fcc.gov/consumers/guides/how-comment and fcc.gov/general/electronic-and-hard-copy-filing-address web pages. The public and those requiring accessibility accommodations must not be forced to rely on a nonfunctional email address as the exclusive method for obtaining filing instructions.
6. That the Commission publish explicit, accessible instructions differentiating the Electronic Comment Filing System (ECFS) from the International Communications Filing System (ICFS). These instructions must clearly guide the public on how to identify the correct system for a given proceeding, how to navigate any required credentialing, and how to successfully participate in ICFS-housed submissions.

Because the technical barriers documented in this letter arose directly from the Commission's filing infrastructure and accessibility response procedures, the undersigned is hopeful that the Section 504 Compliance Officer is positioned to take the corrective actions necessary to ensure that public notice and participation rights, as observed in this proceeding, comply with the Commission's obligations going forward. Each request in Section II is directed to that end.

III. SYSTEMIC CONCERN

This complaint is not limited to the undersigned's experience. Every member of the public who encounters a similar digital accessibility barrier in an ICFS-housed satellite proceeding and follows the pathway the Commission's Public Notice provides will reach the same office that redirected this request to nonfunctional systems.¹¹ The accessibility pathway published in Commission public notices should connect the public with the proceedings those notices describe. The full systemic analysis is at Appendix E. The undersigned eventually gained access to ICFS after seven days of independent research that the Commission's accessibility framework is designed to make unnecessary. That the undersigned overcame the barrier does not cure the failure that created it, nor does it make whole the injury from delayed participation. The Handbook's procedures exist so that members of the public do not have to independently navigate an undisclosed credentialing system to participate in a federal proceeding. The undersigned's eventual success is evidence of persistence, not evidence of a functioning

¹¹Under the Twenty-First Century Communications and Video Accessibility Act, the Commission requires private-sector entities to ensure that their products and services are accessible. The question is whether the Commission's own filing infrastructure meets the standard it applies to others.

accessibility framework. A member of the public who lacks the time, technical capacity, or familiarity with federal systems to conduct that independent research would not have participated at all. The seven days lost and the procedural barriers encountered are not mooted by their eventual resolution.

I would be happy to assist your office with any additional information on the barriers encountered as warranted to help bring resolution to these participatory challenges.

Respectfully submitted,

/s/ Nikolai G. Bakken

PRESERVATION AND FILING BASIS

All questions and requests herein are preserved for any future administrative or judicial proceeding, including reconsideration under 47 U.S.C. § 405 and judicial review under 47 U.S.C. § 402(b) and 5 U.S.C. § 706. The accessibility failure is independently preserved as a procedural defect under 5 U.S.C. § 555(b), 29 U.S.C. §§ 794 and 794d, and the Commission's Section 504 Handbook. The undersigned notes that the matters documented in this letter may independently support a formal complaint under 47 C.F.R. Section 1.1870 and reserves all rights under that provision without invoking it at this time.

All prior filings by the undersigned in this proceeding, including the Bakken IO (March 6, 2026), Bakken EP (March 9, 2026), Bakken SIO (March 15, 2026), Bakken CDN (March 15-16, 2026), Bakken IR (March 17, 2026), and Bakken Reply (March 21, 2026), together with all exhibits, appendices, and sworn declarations, are incorporated by reference and remain independently operative. Nothing in this letter narrows, waives, or supersedes any prior argument, position, or request for relief. This letter is a petition to the government for redress of grievances, protected by the First Amendment and the Noerr-Pennington doctrine.

Filed as: Informal request pursuant to 47 C.F.R. § 1.41 and the Commission's Section 504 Programs and Activities Accessibility Handbook.

APPENDICES

The following Appendices provide the full factual record, legal framework, procedural analysis, and documentary exhibits. Each is incorporated by reference into the body of this letter.

Appendix A: Documented Timeline

Appendix B: The Accessibility Framework and Its Application

Appendix C: Identified Procedural Departures

Appendix D: Outstanding Questions

Appendix E: Systemic Concern

Exhibit 2: Screenshot of DNS Delivery Failure for ecfs@fcc.gov (March 25, 2026)

APPENDIX A

DOCUMENTED TIMELINE

February 4, 2026: The Bureau released DA 26-113, accepting for filing the Application of Space Exploration Holdings, LLC and establishing a thirty-day public comment period. The Public Notice directed accessibility requests to FCC504@fcc.gov.

February 5, 2026 (5:07 AM EST): The undersigned sent a "get form" request to ecfs@fcc.gov, the address the Commission's published guidance identifies for obtaining filing instructions. The email returned a DNS delivery failure indicating the recipient's domain did not exist. See Exhibit 1.

February 5, 2026 (5:12 AM EST): The undersigned sent a second "get form" request to ecfs@fcc.gov. The email returned an identical DNS delivery failure. See Exhibit 1.

February 5, 2026 (8:49 PM EST): The undersigned sent a third "get form" request to ecfs@fcc.gov. The email returned an identical DNS delivery failure. See Exhibit 1.

February 5, 2026 (8:56 PM EST): Seven minutes after the third failed attempt, the undersigned contacted the Commission's designated accessibility office at FCC504@fcc.gov:

*"Hello, I am attempting to provide a comment on the public notice of SAT-LOA-20260108-00016 in reference to the FCC's DA 26-113 notice. The methods outlined to provide public notice are not available. The filing does not exist in the ECFS system and standard public comment reply is unable to be submitted. Additionally the backup method email of ecfs@fcc.gov is sending delivery errors for over 24 hours when attempting to 'get form.' **Therefore, I need accessibility help in order to complete my public notice reply or a proper channel my submission can be submitted to.** Nikolai Bakken"*

The email to ecfs@fcc.gov had returned a DNS delivery failure indicating that the recipient's domain did not exist. See Exhibit 1. This failure was also referenced in the Bakken EP at Section I.E.4.

February 9, 2026 (3:38 PM EST): The FCC504 office responded:

"The e-mail address, FCC504@fcc.gov, is designed to allow people with disabilities to submit requests for accommodations such as sign language interpreters, Braille documents, etc. for FCC events. We are not equipped to deal with complaints/questions about regulatory matters. To be more responsive to your comment, inquiry, or complaint, we direct your attention to the options below.

By following the steps below for comments, complaints, or inquiries, we will begin to act on your communication right away:

If you would like to file a COMMENT in a PROCEEDING, please visit our Electronic Comment Filing System (ECFS) at <http://apps.fcc.gov/ecfs/>. On ECFS, you can file a comment in any open proceeding by clicking on 'Submit a Filing' in the upper left hand corner of your screen. If you are not sure how to find a docket, try the 'Submit a Filing (Express)' link, also in the upper left hand corner -- this will take you to a list of the most active open proceedings, and you can file your comment directly from this page.

For assistance with using ECFS, please contact the ECFS Help Desk at 202-418-0193 or via email at ECFSHelp@fcc.gov.

If you would like to make an INQUIRY into an FCC policy, or have general questions that the FCC might be able to answer, please call our consumer call center directly at 1-888-CALL-FCC (1-888-225-5322) or 1-888-TELL-FCC (1-888-835-5322)." [See below screenshot for full exchange]

The response directed the undersigned exclusively to ECFS, the system the undersigned had attempted to access three times over 15 hours before turning to the accessibility channel as a last resort. Every option the office provided leads to a system, office, or phone line that cannot connect the caller to an ICFS-housed satellite proceeding. The undersigned had identified the proceeding by file number and public notice number. The office responded with generic consumer routing that does not reach satellite licensing dockets. No option provided connected the undersigned to the proceeding. It also did not provide a path for escalation or further assistance on accessibility matters.

February 11, 2026: The undersigned gained full access to ICFS after independently discovering the CORES credentialing requirement.

Seven days of the thirty-day comment period elapsed before the undersigned could read the application the Commission had invited the public to evaluate.

March 25, 2026: The undersigned sent a "get form" request to ecfs@fcc.gov and received an identical DNS delivery failure within one minute. See Exhibit 2.

The Commission's published guidance at fcc.gov/consumers/guides/how-comment and fcc.gov/general/electronic-and-hard-copy-filing-address continues to instruct commenters to email ecfs@fcc.gov with the words "get form" to receive filing instructions. That address appears to have remained nonfunctional for at least seven weeks. The Commission does not make the filing form available as a direct download. The sole method of obtaining it is to email a nonfunctional address.

This design creates a single point of failure with no alternative pathway. When that single point fails, as it has for the entirety of this proceeding, the public has no independent means of obtaining the instructions the Commission's own guidance describes as available.

APPENDIX B

THE ACCESSIBILITY FRAMEWORK AND ITS APPLICATION

B.1. No Disability Disclosure Required

The Commission's standard accessibility language in DA 26-113 identifies four accessible formats: braille, large print, electronic files, and audio format. It does not condition assistance on disclosure of a specific disability or require a requestor to identify a qualifying condition. The inclusion of "electronic files" among the accessible formats encompasses the type of access the undersigned was seeking: the ability to electronically access and file in the proceeding.

The Rehabilitation Act prohibits federal agencies from excluding persons from participation in their programs on the basis of disability. 29 U.S.C. § 794. The Section 504 Handbook does not condition the obligation to assist on the requestor's disclosure of a specific disability. Screening requestors for disability status before providing assistance would itself raise concerns under the Act. The undersigned's email stated: "I need accessibility help." That language invoked the accessibility framework the Public Notice identified.

B.2. Technical Barriers Are Accessibility Claims

The Commission maintains Section 508 as a parallel framework requiring federal electronic and information technology to be accessible. 29 U.S.C. § 794d. The Commission's accessibility page instructs the public to report Section 508 issues to Section508FCC@fcc.gov, including four elements: a description of the problem, preferred format, the URL, and contact information. The undersigned's February 5 email contained all four.

The Commission designates FCC504@fcc.gov as the accessibility contact for filing assistance across its consumer guides. The "How to Comment on FCC Proceedings" guide states: "If you have questions about access for people with disabilities, send an email to FCC504@fcc.gov." The "Formal Comments on Proceedings" guide contains identical language. The standard AccessInfo language states: "People with disabilities who need assistance to file comments online may request assistance by email to FCC504@fcc.gov."

The FCC504 office's characterization of its role as limited to event accommodations is inconsistent with the Commission's own published materials, which designate FCC504@fcc.gov as the accessibility contact across its entire consumer-facing output, not merely for event accommodations. Section 508 requires not only that federal electronic information technology be accessible, but that the agency's technical support pathways be capable of resolving access failures when they occur. A support framework that returns the requestor to the system the requestor has just identified as broken does not satisfy this obligation. The violation is not the

initial system failure. It is the failure of the designated support pathway to resolve or escalate the access barrier.

B.3. Published Records Document the Scope

The Section 504 Handbook requires staff to help requestors "to the best of [their] ability" and to forward requests to the Section 504 Officer "IMMEDIATELY" when they cannot satisfy the need. For electronic access issues, the Handbook designates the Section 508 Coordinator.

The Commission's Systems of Records Notices reinforce this framework. The IB-1 SORN states that filing records "will be publicly available." The OS-1 SORN states the Commission "offers multiple avenues" for public involvement. The WTB-7 SORN describes a system to "process requests for assistance from individuals or groups in connection with FCC systems, research tools, electronic databases, licenses, authorizations, and registrations."

APPENDIX C

IDENTIFIED PROCEDURAL DEPARTURES

Based on the documented timeline and the Commission's own published procedures, the following departures from the Handbook and applicable framework are identified:

1. The FCC504 office did not help the requestor to the best of its ability, as required by the Section 504 Handbook. The response redirected the requestor to the system already identified as nonfunctional (ECFS), to the consumer complaint line (which handles telecommunications service complaints, not proceeding access issues), and to the consumer call center. The FCC504 office conditioned its assistance on an undocumented, internally defined scope limited to event accommodations. That limitation appears nowhere in the Commission's Public Notice, the Handbook, or any published consumer guide. By substituting its own narrow definition of its role for the scope the Commission's published materials establish, the office created a procedural barrier between the requestor and the escalation pathway the Handbook requires.
2. The FCC504 office did not forward the request to the Section 504 Officer, as the Handbook requires when the office cannot satisfy the need.
3. The FCC504 office did not forward the request to the Section 508 Coordinator, as the Handbook directs for issues involving access to electronic data, resources, and equipment.
4. The FCC504 office did not contact the Space Bureau, the Satellite Division, or any other office that could have identified ICFS as the correct filing system and disclosed the CORES credentialing requirement.
5. The FCC504 office did not identify ICFS as the correct filing system, did not disclose the CORES credentialing requirement, and did not disclose the non-.gov hosting infrastructure associated with the CORES credentialing system.

6. The response took four days (February 5 to February 9), during which the thirty-day comment period continued to run.
7. The FCC504 office's response provided no escalation pathway. It did not identify the Section 504 Compliance Officer, the Section 508 Coordinator, or any alternative contact. The Handbook requires internal escalation when a need cannot be satisfied. The response instead terminated the interaction and redirected the requestor outward to nonfunctional systems. The absence of any disclosed escalation pathway is not limited to this proceeding. It is a structural gap in the Commission's accessibility response framework.
8. Public Notice DA 26-113 omitted any standard "For further information, contact" line identifying a specific Bureau staff member responsible for the proceeding. The Commission's standard practice for public notices of this type is to identify a direct point of contact for public inquiries. The omission left the designated accessibility office as the only identified pathway for a member of the public who encountered barriers to participation. When that pathway failed, there was no disclosed alternative within the Bureau that issued the notice.

APPENDIX D

OUTSTANDING QUESTIONS

The following questions are directed to the Section 504 Compliance Officer:

1. Was the February 5, 2026 email logged in the Commission's accommodation tracking system, as the Section 504 Handbook and OWD-1 SORN contemplate?
2. If it was not logged, does the Commission's current tracking practice conform to the Handbook and the OWD-1 SORN?
3. Was the February 9, 2026 response consistent with the Handbook's requirement to assist requestors to the best of the office's ability?
4. Was the failure to route the request to the Section 504 Officer or Section 508 Coordinator a departure from the Handbook's escalation procedures?
5. Did redirecting the requestor to the system the requestor had just identified as nonfunctional constitute assistance "to the best of [the office's] ability"?
6. What procedures exist to ensure that technical access barriers regarding specific proceedings are routed to the correct bureau or division?
7. Does the Commission provide training to FCC504 office staff on the existence and operation of ICFS, the CORES credentialing requirement, and the distinction between ECFS-housed and ICFS-housed proceedings?

8. Is the Section 504 Compliance Officer aware that ecfs@fcc.gov has been returning DNS delivery failures since at least February 5, 2026 and continues to do so as of March 25, 2026? Has this failure been referred for resolution?
9. Does the FCC504 office's characterization of its role as limited to event accommodations reflect the Commission's understanding of that office's responsibilities, given that the Commission publishes FCC504@fcc.gov as the accessibility contact across its consumer guide library?
10. Does the Commission intend to review whether its standard Public Notice accessibility language is adequate to connect the public with ICFS-housed proceedings, given that DA 26-113 did not disclose the separate filing system, the credentialing requirement, or the distinction between ICFS and ECFS?
11. Given that DA 26-113 omitted any standard "For further information" Bureau contact line, how was a member of the public who encountered any barrier to participation supposed to report that barrier to the Bureau responsible for the proceeding, when the designated accessibility office declined to escalate?

APPENDIX E

SYSTEMIC CONCERNS

This inquiry is not limited to the undersigned's individual experience. The Commission's satellite licensing proceedings are housed exclusively in ICFS. If the FCC504 office's standard response to a technical access inquiry regarding a satellite proceeding is to redirect the requestor to ECFS, the consumer complaint line, and the consumer call center, then every member of the public who encounters a similar barrier and follows the accessibility pathways the Public Notice identifies will receive the same non-responsive guidance.

The Commission's accessibility framework should ensure that staff who receive accessibility requests are trained to identify the correct filing platform for the proceeding at issue and to route requests to the appropriate bureau or division. Without such training, the accessibility pathway published in Commission public notices does not connect the public with the proceedings those notices describe.

The Commission is the federal agency Congress has charged with enforcing accessibility requirements on the private telecommunications industry. Under the Twenty-First Century Communications and Video Accessibility Act, the Commission requires manufacturers and service providers to ensure that their products and services are accessible and usable by individuals with disabilities, to provide access to technical support services, and to refrain from removing or hindering accessibility features.

The question this letter raises is not whether the Commission should hold itself to a higher standard than the entities it regulates. It is whether the Commission's own filing infrastructure and accessibility response procedures meet the standard it already applies to others.
